Introduction

The "Tutankhamun - Interactive Egypt" CD-ROM™: a fun way to learn about Egypt's magnificent cultural heritage!

This CD-ROM offers you a multifaceted view of ancient Egyptian life. Learn about the gods and goddesses, the myths and history of ancient Egypt. Discover the tombs of the pharaohs and prepare a virtual mummy. Have fun with games based on Egyptian themes.

The first eight sections of this CD-ROM deal with the most important topics. An entire section is devoted to the young pharaoh, Tutankhamen.

The games in the "edutainment" section are thematically related to these first eight sections and can be directly accessed from them by links.

The individual sections contain brief animated features that allow you, for example, to identify gods and goddesses, or make use of what you've learned about the pharaoh's crowns and insignia. The "time travel" section presents an animated map of Egyptian history and invites you to zip through the centuries with our "time machine". The knowledge gained in the section on "mummification" can be put into practice right away with our mummy simulation program.

The learning system also includes such helpful features as bookmarks, notepads, a search function, a glossary and an animated help program.

Travel back in time to ancient Egypt.

Travel 5000 years into the past!
With Egypt at the center of a large map encompassing North Africa, Europe, and an area extending through the Middle East to the Hindu Kush (a mountain range in present-day Pakistan and Afghanistan), you can follow the development of various societies over the course of time and see how they interacted during different epochs..

C

Practice writing in hieroglyphics.

It's easy with our little hieroglyphics scribe.
Just type in one or more words on your keyboard and our invisible scribe will immediately display the corresponding Egyptian hieroglyphs on the screen.
Our learning system also includes a number scribe and a module that transcribes modern dates into their ancient Egyptian format.

BONUS-MATERIAL:

This CD-ROM has an extensive download area with material such as photographs and maps that can be used as PowerPoint presentations or overhead projections. They are thus suitable for use by students and teachers.

Can you prepare the mummy for burial?

In the mummifier simulation program, you can carry out the ancient Egyptian rituals required for complete embalming. You can review all the steps needed to prepare the dead for the afterlife.

1 The contest comprises the following 5 games:

Where is Tutankhamun's tomb? Find it!

Play the role of Howard Carter in this game. Try to find Tutankhamun's tomb for your patron, Lord Carnavon. With a bit of luck, you'll be able to embark on a three-dimensional exploration of the tomb, take apart the nested coffins and examine each one individually.

2

Find the mystical amulets and symbols

Find the matching pictures! They change position, and may even be replaced by new pictures, at the start of each new game. In the section on "The cult of the dead" you'll find background information on symbols, amulets, and other cult objects found in tombs.

3

Can you recognize the gods at the shrine?

Use your skill to obtain matching figures and earn points. Two identical heads are good, but three are better. Points depend on the god whose pictures match up. In the section on "Gods and goddesses", you'll find a list of the important gods and goddesses of ancient Egypt.

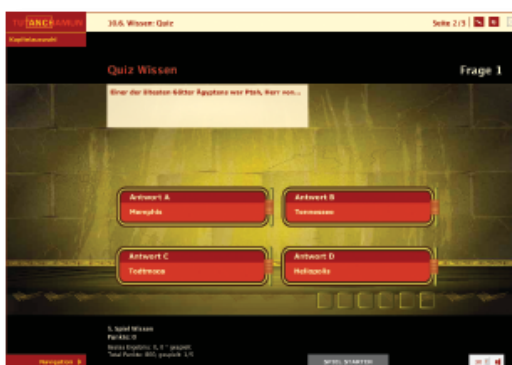

4

Put together the hieroglyphs that spell out the pharaoh's name

A person with a good visual memory would have had a good chance of success as an Egyptian scribe. Here you can work to develop the speed and dexterity needed to catch the hieroglyphs needed to spell out the ruler's name.

5

Test your knowledge of ancient Egypt

Things are not always what they seem to be. Much that we assume to be true about ancient Egypt is little more than legend, or is based on errors that have since been refuted by archeologists. Our quiz poses some tough questions. How solid is your knowledge?
